Michigan State University Outreach and Engagement **AWARDS**

March 21, 2024

4:30 – 6:30 p.m.

Kellogg Hotel and Conference Center
Big Ten C

LAND ACKNOWLEDGEMENT FOR MICHIGAN STATE UNIVERSITY

Michigan State University occupies the ancestral, traditional, and contemporary lands of the Anishinaabeg – Three Fires Confederacy of Ojibwe, Odawa, and Potawatomi peoples. In particular, the university resides on land ceded in the 1819 Treaty of Saginaw. We recognize Michigan's 12 federally recognized Native Nations, historic Indigenous communities in Michigan, Indigenous individuals and communities who live here now, and those who were forcibly removed from their homelands. In offering this land acknowledgement, we affirm Indigenous sovereignty, history, and experiences.

A Michigan Agricultural College map from 1857 overlaid with a modern map of Michigan State University. The circled area indicates the location of the Native encampment in 1857.

Program

WELCOME REMARKS

Kwesi Brookins

Vice Provost for University Outreach and Engagement

Kevin M. Guskiewicz

President of Michigan State University

PRESENTATION OF AWARDS

Spartan Volunteer Service Awards

Marissa Malleck, Hady Omar, Arianna Pittenger

2024 Graduate Student Awards for Community Engagement Scholarship

Farish Jazlan, Taylor Elyse Mills, María Alejandra García Otero

2024 Graduate Student Award for Science Communication and Outreach

Sheril Kirshenbaum

2024 Distinguished Partnership Award for Community-Engaged Creative Activity

Creativity in the Time of COVID-19: Art for Equity and Social Justice

2024 Distinguished Partnership Award for Community-Engaged Teaching

Making Better Veterinarians and Providing Services for Pets

2024 Distinguished Partnership Award for Community-Engaged Service

PFAS Research, Education, and Action for Community Health

2024 Distinguished Partnership Award for Community-Engaged Research

Supporting Educators' Well-Being and Relationship-Based Practices in Early Childhood Programs

2024 Distinguished Partnership Award for International Community-Engaged Scholarship

Energy Convergence for Off-Grid Amazonian Communities

Michigan State University Community Engagement Scholarship Lifetime Achievement Award

Terrie E. Taylor

CLOSING REMARKS

Kwesi Brookins

Spartan Volunteer Service Awards

A presidential recognition, the award celebrates MSU students' commitment to community-engaged learning and is given to students who volunteer 100 hours or more in one year.

Remarks by Allyn R. Shaw, Assistant Vice President for Student Development and Leadership and Dean of Students

and

*Introduced by Renee C. Brown, Director
Center for Community Engaged Learning*

Recipients

Of the 130 students who received the Spartan Volunteer Service Award, three students volunteered over 750 hours in the 2022-2023 academic year and are being recognized today.

Introduced by Kristopher C. Keyton, Assistant Director, Student Volunteer Programs, Center for Community Engaged Learning

- **Marissa Malleck**, Lyman Briggs College and Honors College
- **Hady Omar**, College of Natural Science
- **Arianna Pittenger**, College of Social Science

2024 Graduate Student Awards for Community Engagement Scholarship

Recognizing graduate and graduate professional students for
outstanding community-engaged scholarship

*Introduced by Pero Dagbovie, Vice Provost for Graduate and
Postdoctoral Studies and Dean of the Graduate School*

This award is co-sponsored by The Graduate School.

2024 Recipients

Community-Engaged Service and Practice

FARISH JAZLAN, College of Engineering

Evaluation of Ferry Services on Beaver, Sugar, Neebish, and Drummond Islands and Determining State Transportation Responsibilities to Island Residents

Michigan has the second-longest coastline after Alaska, with approximately 15,000 residents inhabiting the five most populous islands. Island residents expect to have equal access to work, health care, emergency services, and economic opportunities as mainland residents. Funded by the Michigan Department of Transportation, the project's main objectives were to identify mobility gaps for island residents and determine how authorities can intervene. The study's outcomes included insight into existing ferry operations, mobility gaps, and maintenance/funding needs. Farish Jazlan and the project team proposed strategic recommendations for MDOT on how state and federal authorities can address island residents' welfare and mobility needs.

Community-Engaged Teaching and Learning

TAYLOR ELYSE MILLS, College of Arts and Letters

Anishinaabeg Law: An Introduction to Tribal Law for Michigan Legal Practitioners

Most Michigan-based legal practitioners lack adequate training in Tribal laws; this in turn marginalizes Tribes and Native law students. Taylor Elyse Mills sought to address these issues in partnership with the Little Traverse Bay Bands of Odawa Indians and the Tribal State Federal Judicial Forum in Michigan. Their research identified Tribal law that students need to know and how to develop a pedagogical approach that incorporates DEI and avoids tokenism. Mills compiled a Tribal Law Handbook. The handbook will serve as resource to prepare Michigan legal practitioners for work with Tribes and to demarginalize Tribal communities in legal education.

2024 Recipients

Community-Engaged Research

MARÍA ALEJANDRA GARCÍA OTERO, College of Agriculture and Natural Resources

Transforming Gender Norms in Rural Development: A Case in Colombia

María Alejandra García Otero's research focuses on advancing gender equality, the fifth UN Sustainable Development Goal. She worked with Corporación Mundial de la Mujer Colombia (CMMC) to explore its gender development programs in Colombia, focusing on how they foster rural empowerment and challenge gender norms. As part of her dissertation, García Otero collaborated with CMMC and her advisor on a research and intervention proposal aimed at empowering rural women at the collective level by transforming gender norms and addressing the roots of inequality.

2024 Graduate Student Award for Science Communication and Outreach

Recognizing and honoring graduate and graduate
professional students for excellence in science
communication and outreach

*Introduced by Pero Dagbovie, Vice Provost for Graduate and
Postdoctoral Studies and Dean of the Graduate School*

This award is co-sponsored by The Graduate School.

2024 Recipient

SHERIL KIRSHENBAUM, College of Agriculture and Natural Resources

Serving Up Science

As the writer and host of the PBS/WKAR series *Serving Up Science*, Sheril Kirshenbaum educates viewers about food and its impacts on health and the environment. Food choices and agricultural practices set the course for the collective future of food production and its impact on the environment. However, a lack of public understanding and support for science and research related to the way food is harvested, consumed, and wasted on a personal and international scale may hinder progress. *Serving Up Science* navigates these complex relationships within the global food system for a wide variety of audiences.

Distinguished Partnership Awards

Recognizing highly engaged and scholarly
community-based research, creative activity,
teaching, and service collaborations, both in the
United States and abroad, that positively impact
both the community and scholarship

*Introduced by Kwesi Brookins
Vice Provost for University Outreach and Engagement*

Distinguished Partnership Award for Community-Engaged Creative Activity

2024 Recipient

CREATIVITY IN THE TIME OF COVID-19: ART FOR EQUITY AND SOCIAL JUSTICE

Nancy DeJoy, College of Arts and Letters

Capital City Film Festival

Impression 5 Science Center

Lansing Art Gallery and Education Center

REACH Studio Art Center

Refugee Development Center

Introduced by Judith Stoddart, Vice Provost for University Arts and Collections

Nancy DeJoy's community-university partnerships at MSU span 15 years. Focused on social justice issues related to identity, DeJoy has worked with survivors of sexual violence and several community partners. These partnerships have resulted in art exhibits/installations and conference presentations, expanding the public spaces for voices of people often not heard in the stories we tell about who we are as a community. Her most recent collaboration, "Creativity in the Time of COVID-19: Art for Equity and Social Justice," makes space for the creative work of those disproportionately affected by the pandemic. DeJoy and her partners collaborated to write a grant for the project. Funded by the Mellon Foundation, the exhibit included over 200 pieces of art from seven continents. Satellites to the main exhibits were installed at the Refugee Development Center, REACH Studio Art Center, Lansing Art Gallery and Education Center, and Impression 5, ensuring that diverse populations could view and respond to the stories told by exhibit materials. MSU Libraries will house a repository of the exhibits, making them available to people around the world and adding to the story of the pandemic the voices and creative work of many who often go unheard.

Distinguished Partnership Award for Community-Engaged Teaching

2024 Recipient

MAKING BETTER VETERINARIANS AND PROVIDING SERVICES FOR PETS

Donna L. Harris, College of Veterinary Medicine

CSNIP (Community Spay/Neuter Initiative Partnership)

Introduced by Carolina Restini, Associate Professor, College of Osteopathic Medicine

MSU College of Veterinary Medicine (CVM) and CSNIP have collaborated since the first student requested to participate in an externship there in 2009. This collaboration has expanded and developed into a true partnership in which fourth-year veterinary students can hone their skills while serving CSNIP clients. For MSU CVM students, the CSNIP externship is one of the most sought-after experiences. Three students are accepted for each three-week block and rotate through surgical practice, anesthetic induction, and working at the Well Pet Clinic. Because of CSNIP's high caseload, students have the opportunity to advance their surgical and clinical skills at a rapid pace. In addition, students are exposed to clients from diverse backgrounds who have many challenges when accessing traditional veterinary care. CSNIP collaborates with CVM faculty when needed on complex cases, conducts research, and has seen a rise in patient care standards. CSNIP staff members enjoy the challenge of teaching veterinary students and the energy they bring to the practice. Another important benefit of this partnership is that it has developed a cohort of veterinarians who value the role nonprofits play in providing veterinary care for a community.

Distinguished Partnership Award for Community-Engaged Service

2024 Recipient

PFAS RESEARCH, EDUCATION, AND ACTION FOR COMMUNITY HEALTH

**Courtney Carignan, College of Agriculture and Natural Resources and
College of Veterinary Medicine**

Great Lakes PFAS Action Network

Introduced by Deanna East, Associate Director, MSU Extension

Per- and polyfluoroalkyl substances (PFAS) were first discovered in 2010 at the former Wurtsmith Air Force Base in Oscoda, a town in Michigan on the coast of Lake Huron. Since then, many other PFAS-impacted sites have been identified in Michigan and across the globe. Detection of substantial contamination in drinking water can be an enormous source of stress for communities, which can be addressed by helping to improve understanding and promote health protective action. Courtney Carignan's engagement with communities aims to provide service by sharing information, useful connections, and resources. Her research helps identify and address major gaps in knowledge or resources that are of high concern to the community. PFAS contamination was discovered in Rockford and Belmont (Kent County) in 2017 in connection with poor disposal practices by a local tannery. Spurred by the need for educational support voiced by the affected community and others, Carignan helped develop fact sheets on PFAS blood testing and medical screening as part of PFAS REACH, an NIH-funded project. Her service and research aim to support autonomy and empowerment of community partners through shared decision-making.

Distinguished Partnership Award for Community-Engaged Research

2024 Recipient

SUPPORTING EDUCATORS' WELL-BEING AND RELATIONSHIP-BASED PRACTICES IN EARLY CHILDHOOD PROGRAMS

Holly E. Brophy-Herb, College of Social Science

Head Start for Kent County

*Introduced by Kay Connelly, Associate Vice President for Research
and Innovation*

High-quality early care and education for very young children offer the largest, longest impacts on children's development, compared to programs beginning later. However, early childhood teacher stress/burnout, occurring at higher rates than among teachers of older children, poses significant risks to their capacity to engage in high-quality educational practices. Similarly, early childhood home visitors support a diverse population of children and families, including those whose development is at greater risk due to complex, poverty-related stressors. Over the past 26 years, the sustained, productive relationship between Holly Brophy-Herb and Early Head Start (EHS)/Head Start (HS), a federally funded program serving children 0-5 and their families experiencing low income, has addressed these critical issues. Their shared goals are to develop, implement, and evaluate materials to support children's social-emotional development, health, and well-being via promoting caregiver (parents, teachers, home visitors) well-being and high-quality practices. This partnership has yielded the development of widely adopted curricula, almost 20 publications, and more than \$2.9 million in funding. Longitudinal work on stress with more than 100 early childhood teachers provided significant insight into coping and is informing next steps in the team's work.

Distinguished Partnership Award for International Community-Engaged Scholarship

2024 Recipient

ENERGY CONVERGENCE FOR OFF-GRID AMAZONIAN COMMUNITIES

Maria Claudia Lopez Perez, College of Agriculture and Natural Resources

Emilio Moran, College of Social Science

Rachel Mourão, College of Communication Arts and Sciences

Laboratory of Renewable Energy, Universidade Federal do Oeste Pará, Brazil

Introduced by Steven Hanson, Vice Provost and Dean for International Studies and Programs

Approximately 650 million people worldwide lack consistent and affordable access to energy. Many of them reside in areas not covered by their country's national grid, and, as a result, they rely on expensive and unreliable diesel generators. An interdisciplinary team of researchers from MSU and Brazil are collaborating with four off-grid communities in Santarém, Brazilian Amazon, to address this issue. Before this project, these communities had access to electricity for at most two to three hours per day, provided they could afford diesel fuel for a community generator. This lack of reliable electricity prevented them from having basic appliances, such as refrigerators, water pumps, and internet modems. Grounded in the scholarship of energy justice, energy sovereignty, and participatory co-design, researchers are working closely with communities through steps that include dimensioning, planning, installation, training, and managing an improved off-grid energy system. Researchers fostered community engagement through citizen science, participatory workshops, surveys, observations, and interactions with community members. Additionally, they provided training on technical installation and maintenance. Each community now owns and governs a system co-designed to align with its values, needs, and local ecological characteristics. They are no longer in the dark.

Michigan State University Community Engagement Scholarship Lifetime Achievement Award

Recognizing individuals of outstanding sustained accomplishment in community-engaged scholarship through research, creative activity, teaching, and/or service and practice over the span of a career

*Introduced by Kwesi Brookins
Vice Provost for University Outreach and Engagement*

2024 Recipient

TERRIE E. TAYLOR

MSU Foundation Professor

University Distinguished Professor of Tropical Medicine

College of Osteopathic Medicine

Terrie E. Taylor is an internationally recognized scientist and physician who has devoted her career to the fight against malaria, which she calls the “Voldemort of parasites.” For nearly 40 years, she has worked tirelessly to save the lives of children in Africa afflicted with the deadliest form of the disease. She spends six months of the year in Malawi conducting malaria research while also treating patients, the vast majority of whom are children.

Since joining the faculty of the MSU College of Osteopathic Medicine, Taylor has collaborated with international communities in her scholarly, clinical, and outreach efforts. She has co-authored more than 200 peer-reviewed articles and has received nearly \$35 million in grants, many of which included researchers trained by her in the communities where she is engaged.

A passionate and dedicated educator, Taylor has hosted 24 students per year at her own expense for six-week rotations at Queen Elizabeth Hospital in Blantyre, Malawi, teaching them in groups of eight at a time. The Blantyre Malaria Project, established by Taylor and colleagues, conducts research and patient care in the field of pediatric cerebral malaria.

Taylor began her career by supervising an NIH-funded MSU grant in the Sudan. Upon her return, she completed an internal medicine residency, followed by a fellowship in tropical medicine at the Liverpool School of Tropical Medicine. The fellowship placed her in Malawi researching malaria, where she fell in love with the people and the country and found her calling.
